## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liang of record for reasons of record.

### *Response to Arguments*

Applicant's arguments filed 6/12/07 have been fully considered but they are not persuasive.

Applicants argue that the present claims are directed to a one-stage electrodeionization device, whereas the Liang patent is used in a two-stage electrodeionization device.

The fact that the Liang patent is directed to a two-stage device is not patentably relevant, since only one stage of the device can be used to reject the claimed invention.

Applicants further argue that the Liang patent would not provide the inspiration of using alternatively positioned concentrating compartments and desalting compartments filled with mixed ion exchangers of different ratio.

The Liang patent discloses the use of a variety of alternatively positioned mixed chambers (see column 10, lines 36-58). The reference further discloses the use of a bed having greater anion exchange resins provides the benefit of elevated pH (see column 9, lines 30-60, in particular lines 50-53).

Accordingly, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Liang patent with the teachings contained therein, because the Liang patent teaches the use of the control of pH to obtain the separation of a variety of contaminants by the selection of appropriate ion exchange resin mixtures and ratios.

Therefore, the claims stand rejected.

#### *Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
